Press Release

KEMCO SYSTEMS ANNOUNCES CONSERVE – WATER RECYCLING AS A SERVICE TO THE LAUNDRY INDUSTRY

June 25, 2019 | Clearwater, FL | Kemco Systems, a global water and energy technology company, recently announced the introduction of CONSERVE, a program that delivers water recycling as a service to the laundry industry.

Built around our understanding of the challenges of running a laundry, CONSERVE allows laundry operators to install systems that can recycle up to 90% of their water with zero capital investment.

CONSERVE takes care of the burden of ownership of water recycling equipment. Kemco Systems owns and maintains the equipment with limited support from the plant for system maintenance. This smooths plant operation and maximizes uptime. CONSERVE is all-inclusive including everything you need to increase plant efficiencies; state-of-the-art equipment, turnkey installation, consumables, replacement parts, scheduled maintenance, remote monitoring, extended warranty, and full coverage of any and all system failures. CONSERVE produces many performance, environmental, and financial benefits, such as, reduced utility costs and surcharges, exceptional water quality free of all viruses, bacteria, PFOA, PFOS and microplastics, improved product quality, increased longevity of wash aisle equipment, and reduced environmental footprint.

We are giving away an all-inclusive trip for two to the beautiful Sandals Emerald Bay Resort in Great Exuma, Bahamas! Entry deadline is July 15, 2019 and the winner will be announced July 31, 2019.

For more information on this exciting new service from Kemco and entry to win the vacation, please visit: www.kemcosystems.com/conserved2019

About Kemco Systems

Since 1969, Kemco has delivered over 5,000 systems worldwide for industrial water reuse/recycle, wastewater treatment, hot water heating, wastewater heat recovery, flue gas heat recovery, vapor/steam curing and conditioning, and total system monitoring. Built for the most challenging conditions, Kemco's systems are built to the highest standards of excellence, offering exceptional reliability, outstanding quality and top value for its client's energy dollar.
