recycle rates

Best of Both Worlds

Running a laundry is a challenging task, constantly fighting the battle between long-term efficiencies and short-term gains. Kemco's CONSERVE program can help you responsibly manage both while enhancing your position as a steward of the environment.

CONSERVE optimizes the use of resources in your business that have a direct impact on the environment and your bottom line. Unique to your operation, CONSERVE is built around best management practices and state-of-the-art technologies for recycling water in hygienically-clean environments producing unparalleled results for your business and your clients.

- ◇ 90% Rejection PFAS
- ◇ 99% Rejection PFOS
- ◇ 99+% Rejection Viruses & Bacteria
- ◇ Nearly 100% Rejection Synthetic Dyes

Partnership

The CONSERVE team builds a custom savings profile based on the real-life operating data of your specific plant. Once the evaluation is complete, our turnkey installation crew will deploy the custom equipment required to generate and guarantee the identified savings. All this happens without writing a big check and can help generate a positive cash flow from day one.

The partnership continues with an all-inclusive parts, service and maintenance program providing you the peace of mind that the CONSERVE system will continue to deliver substantial savings to your operation for years to come.

Built-Ins

- Turnkey Installation
- Remote Monitoring & Diagnostics
- Worry-Free Parts & Maintenance Program
- Extended Warranty
- Guaranteed Annual Savings

CONSERVE

water recycling as a service

FAQ

CONSERVE

What is CONSERVE?

CONSERVE is an all-inclusive water recycling service designed to reduce water consumption and decrease compliance costs.

What does all-inclusive mean?

CONSERVE is built around our understanding of the challenging task of running a laundry. CONSERVE includes everything you need to increase plant efficiencies.

- ✓ State-of-the-art Equipment
- ✓ Turnkey Installation
- ✓ Consumables
- ✓ Replacement Parts
- ✓ Scheduled Maintenance
- ✓ Remote Monitoring
- ✓ Extended Warranty
- ✓ Full Coverage of any and all System Failures

Is CONSERVE a lease program?

No. CONSERVE is water recycling as a service. We provide our customers with peace-of-mind, producing unparalleled results without writing a big check.

What are the terms?

CONSERVE's initial term is 5 years. At the end of the initial term you will have the option of renewal, removal or a buyout.

What do we need to begin?

There are just two things that we need to build your CONSERVE savings profile.

- ✓ Utility Bills – 12 months of water, sewer, & power
- ✓ Site Access

Is CONSERVE right for our plant?

Yes. CONSERVE is a water recycling and reuse service, so if you have wastewater, CONSERVE can be the solution.

Why CONSERVE?

CONSERVE optimizes the use of resources in your business that have a direct impact on the environment, and your bottom line. This produces many performance, environmental, and financial benefits.

- ✓ No Out-of-Pocket Expenses on Day One
- ✓ No Unexpected Expenses
- ✓ Reduced Utility Costs and Surcharges
- ✓ Net Positive Cash Flow
- ✓ Reuse of up to 90% Water
- ✓ Improved Water Quality
- ✓ Up to 99% Rejection of PFAS, PFOS, Viruses and Bacteria
- ✓ No Hardness
- ✓ Improved Product Quality
- ✓ Whiter Whites
- ✓ Increase Longevity of Wash Aisle Equipment
- ✓ Reduced Environmental Footprint

Do I need maintenance personnel on-site?

Keeping your system operating at maximum performance, is top priority. Kemco will take on many of the preventative maintenance requirements for your system, however, we will expect your team to hold some of the routine maintenance steps. Rest-assured, your team will be fully trained on system operation and daily maintenance.

What if there is an issue with the equipment?

24/7 technical support is available, where we will be able to tap into your system to monitor the status of your equipment. If we are unable to resolve the problem over the phone, we have an expert team that can be deployed to your site quickly to resolve the issue.

Who do I contact to start saving with CONSERVE?
