CECO Environmental Integrates Mefiag Filtration and Kemco Systems Businesses
Strengthening Its Industrial Water Platform Across North America and Europe

CLEARWATER, Fla. / HEERENVEEN, Netherlands (Oct. 14, 2026) - CECO Environmental announces the integration of Mefiag Filtration (Mefiag) and Kemco Systems (Kemco) businesses to better serve its Industrial Water customer base. The combination unites Kemco's water reuse, wastewater treatment and water heating technology with Mefiag's corrosion-resistant filtration system product line. Leveraging the company's capabilities and locations in Clearwater, Fla. and Heerenveen, Netherlands enhances manufacturing, sales and service capabilities for the industrial water product lines serving North America and Europe.

"Bringing Kemco and Mefiag together under one platform reflects the strategy we have been building across our Industrial Water business," said Daniel Duncan, President of Advanced Separation and Water. "Both teams have built highly respected businesses, and now the Mefiag product line has access to the resources, engineering support and manufacturing scale that come with being part of Kemco in North America. In return, Kemco can accelerate business growth in Europe by leveraging our established Mefiag business operations. CECO Environmental continues to enhance its solutions and capabilities to address the most challenging industrial water and wastewater applications."

Kemco, founded in 1969, has delivered more than 10,000 water treatment, reuse and recovery systems worldwide, serving industries including food processing, industrial laundry and general manufacturing. Mefiag, founded in the Netherlands in 1953, has spent more than seven decades supplying corrosion-resistant filtration systems to the electroplating, surface finishing and anodizing industries, later expanding into automotive, construction and sanitary applications. Mefiag joined the CECO family of brands in 2013.

"Kemco and Mefiag have each built deep expertise in their respective corners of industrial water treatment, and this integration has expanded Kemco's scale, our filtration capabilities and the impact we can deliver for customers," said Matt Lewis, Platform Leader, Americas Industrial Water/Wastewater. "We have brought together deep engineering expertise from Kemco and Mefiag, creating one of the broadest industrial water treatment and filtration platforms in the industry. This integration reflects who Kemco is today and positions us to support more customers across a wider range of industries, now and in the future."

This integration reflects CECO's continued investment in its Industrial Water platform.

About CECO Environmental

CECO Environmental is a leading environmentally focused, diversified industrial company, serving a broad landscape of industrial air, industrial water, and energy transition markets globally through its key business segments: Engineered Systems and Industrial Process Solutions. Providing innovative technology and application expertise, CECO helps companies grow their business with safe, clean, and more efficient solutions that help protect people, the environment and industrial equipment. In regions around the world, CECO works to improve air quality, optimize the energy value chain, and provide custom solutions for applications in power generation, petrochemical processing, refining, midstream gas transport and treatment, electric vehicle and battery production, metals and mineral processing, polysilicon production, battery recycling, beverage can production, and produced and oily water/wastewater treatment along with a wide range of other industrial applications. CECO is listed on Nasdaq under the ticker symbol “CECO.” Incorporated in 1966, CECO’s global headquarters is in Addison, Texas. For more information, please visit www.cecoenviro.com.

About Kemco Systems

Since 1969, Kemco Systems, a CECO Environmental Brand, has delivered more than 10,000 systems worldwide for industrial water reuse/recycling, wastewater treatment, water heating and recovery and total system monitoring. Kemco’s systems are built to the highest standards of excellence, for the most challenging conditions and offer exceptional reliability, outstanding quality and top value for its clients energy dollar. Kemco Systems joined the CECO Environmental family of brands in 2023. Learn more at www.kemcosystems.com or follow us on [LinkedIn](#).

About Mefiag Filtration

Founded in the Netherlands in 1953, Mefiag Filtration designs, manufactures and supplies corrosion-resistant filtration systems for the electroplating, anodizing and metal finishing industries. Mefiag's product line includes horizontal disc, cartridge, bag, carbon and pleated filters, along with oil-absorbing filtration systems, serving single-chamber capacities from 10 to 30,000 gallons per hour. Mefiag also supplies filtration solutions to the automotive, construction and sanitary industries. Mefiag joined the CECO

Environmental family of brands in 2013 and operates manufacturing and distribution facilities in Heerenveen, Netherlands and Clearwater, Florida.
