Precision Filtration for Metal Finishing

High-efficiency filtration systems engineered for the most demanding plating and surface finishing environments.

MEFIAG Filter Systems | A CECO ENVIRONMENTAL BRAND

Mefiag delivers proven filtration technologies trusted for over 60 years in the harshest chemical environments, helping manufacturers achieve consistent process quality, extended bath life, and reliable operational performance.

Technologies at a Glance

- Horizontal disc filtration
- Carbon treatment and filtration
- Cartridge and bag filtration
- Oil absorbing filtration

Primary Applications

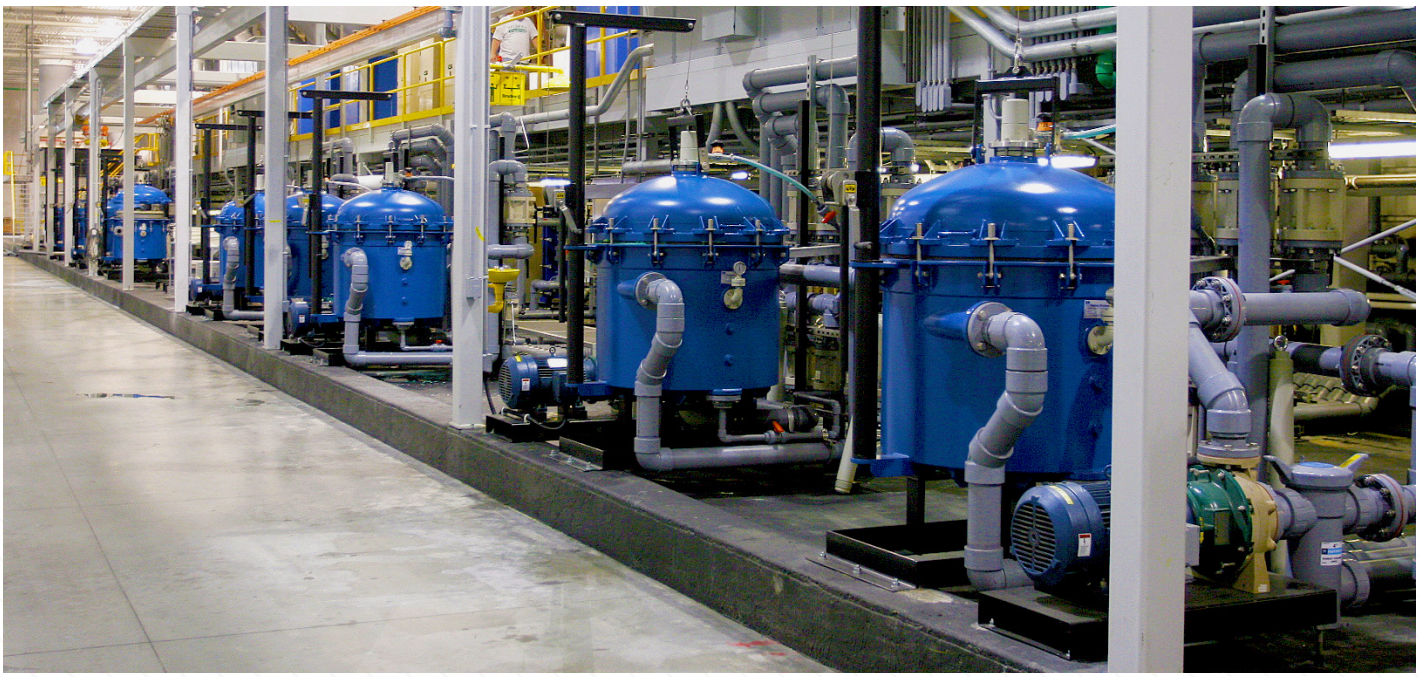

- Nickel, zinc, tin, copper, brass, and chrome plating
- Precious metals and anodizing
- Rinsing and cleaning processes
- Sodium Carbonate Removal

"FILTRATION THAT PERFORMS WHERE IT MATTERS MOST"

WHY MEFIAG?

Mefiag systems are engineered for consistent, high-performance filtration in the most demanding industrial environments. Backed by decades of application expertise, our solutions improve bath quality, extend chemistry life, and help reduce operating costs.

- Flow rates up to 30,000 GPH
- Corrosion-resistant construction for aggressive chemistries
- High sludge holding capacity with reduced disposal costs

11500 47th Street N, Clearwater, FL 33762

MEFIAG Filter Systems | A CECO ENVIRONMENTAL BRAND

CORE TECHNOLOGIES

Horizontal Disc Filters

- High flow capacity with efficient solids removal
- Durable construction for long service life
- Optional slurry tank for pre-coating

Carbon Treatment and Filtration Systems

- Removes particulates and organic contaminants
- Compact design with no separate treatment tanks required

Cartridge and Bag Filtration

- Flexible configurations for a wide range of applications
- High surface area for improved solids loading

Oil Absorbing Filters

- Corrosion-resistant polypropylene construction
- Designed for efficient oil removal and system protection

ABOUT CECO ENVIRONMENTAL

CECO Environmental is a global leader in industrial air, water, and energy transition solutions. Through its Industrial Water platform, CECO helps customers solve complex challenges in water treatment, reuse, and filtration while advancing sustainability and operational performance.

Industrial Water Capabilities

- Advanced filtration and separation technologies
- Engineered systems for process and wastewater treatment
- Solutions designed to reduce environmental impact
- Global expertise with responsive local support
